

Animal Kinds Race

Materials

- Animal kinds cards (following pages)
- One container for each team
- Optional: bell

Instructions

Print and cut out one set of the 24 animal kinds cards for each team. Place each set in an open container and give one to each team.

Set the bell in a central area.

On “go!” teams will race to work together to organize their cards by “kinds.” The first team to organize all of their cards and ring the bell wins. Check their work to see if they organized them correctly to earn a point. Keep score and repeat as time allows.

Suggested Discussion

God didn’t need every single animal on the earth to squeeze onto the ark. No. God only needed to put two of each KIND on the ark. For instance, just two of the cat kind, just two of the dog kind, just two of the horse kind, and just two of each dinosaur kind. Two of EVERY kind, yes! But not every single different type of animal.

- ?** Your cards included whales. Did sea animals need to be on the ark? *No.*

No, most of them would be okay in the water outside.

God made sure there would be plenty of room on the ark and that just the right animals would be on there to fill the earth after the flood!
